

America's Emergency Network Enters into Memorandum of Understanding with Florida Division of Emergency Management

Miami, FL...June 5th, 2008...Brampton Crest International, Inc. (OTCBB: BRCI), today announced that its wholly owned subsidiary, America's Emergency Network, Inc. (AEN), has entered into a Memorandum of Understanding (MOU) with the State of Florida's Division of Emergency Management to establish AEN's emergency communication system. When fully deployed, the AEN system will link Emergency Operations Centers (EOCs) in cities, towns, counties, school boards, and other government entities with the general public, media outlets, first responders, and other government agencies.

The system will send video feeds of news briefings by emergency officials and critical text bulletins issued at any EOC in any location to all users instantly. The satellite-based system is designed to operate before and after disasters, even when telephone, cell phone, and terrestrial internet systems have failed.

The MOU further envisages that during rapidly developing emergencies (tanker accidents, bio-hazards, etc.), the AEN system will provide an instant communications link directly to all subscribing media outlets. Critical information will reach the public much sooner since all subscribing media outlets will receive the text and video feeds immediately.

"We are delighted to have the opportunity to demonstrate our system to the Florida Division of Emergency Management which has long been regarded as the leader in Emergency Management nationwide," said Bryan Norcross, President and CEO of AEN. "We are confident that the AEN system will not only increase the Division of Emergency Management's effectiveness, but will also save lives."

About AEN:

America's Emergency Network was designed by Bryan Norcross, the CBS network hurricane analyst, and Max Mayfield, the former Director of the National Hurricane Center. AEN's goal is to be sure that every emergency manager, whether from a large county or a small town, has an outlet to reach the public, the media, and other government officials. The satellite-based AEN system is designed to continue to work after a disaster when the power lines, phone lines, cell phone towers, and terrestrial internet systems are knocked out.

About Brampton Crest:

Brampton Crest International, Inc. is a publicly traded company which recently acquired America's Emergency Network, LLC (<http://emergency.info>). Brampton also owns and operates a wholly owned finance subsidiary.

Certain statements in this press release that are not historical facts are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements may be identified by the use of words such as "anticipate," "believe," "expect," "future," "may," "will," "would," "should," "plan," "projected," "intend," and similar expressions. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of Brampton Crest International, Inc. (the Company) to be materially different from those expressed or implied by such forward-looking statements. The Company's future

operating results are dependent upon many factors, including but not limited to the Company's ability to: (i) obtain sufficient capital or a strategic business arrangement to fund its expansion plans; (ii) build the management and human resources and infrastructure necessary to support the growth of its business; (iii) competitive factors and developments beyond the Company's control; and (iv) other risk factors discussed in the Company's periodic filings with the Securities and Exchange Commission, which are available for review at www.sec.gov under "Search for Company Filings."
